

## Quilted Stocking Assembly Instructions

NOTE: *Dimensions and instructions are based on stocking stitched at approx. 12 ¼" x 18"*

1. Carefully cut out the quilted stocking shape around the stitched perimeter leaving a ¼" seam allowance.
2. Place the cut out stocking pieces right sides together. Sew around the perimeter of the stocking on the stitched perimeter, leaving the top edge unsewn. Flip the stocking right side out. Set aside.
3. From the fabric selected for the top band of the stocking cut one piece 8 ½" x 18".
4. Sew the short side of the stocking band, right sides together, to form a tube.
5. Fold the tube in half to create a tube half the width, with a fold on one edge and both raw edges on the other edge.

6. Slide the tube inside the stocking matching the raw edges. Pin in several places. Sew the band in place.

7. Flip band over to the right side of the stocking. Press seam flat.
